EXPLAIN CYBERSECURITY WITH AN APERITIF

## HOW TO GET TO A RESPONSIBLE INTERNET: ON NETWORK CONTROL AND NETWORK ACCOUNTABILITY

10<sup>th</sup> SEMINAR

MAR  
13

4.00 pm

Aula R1  
Politecnico di Torino

### Paola Grosso

Paola Grosso (Member, IEEE and ACM) is a Full Professor at the University of Amsterdam with a chair on "Multiscale networks". She is part of the Multiscale Networked Systems research group and director of the Informatics Institute. Her research focuses on the creation of sustainable and secure computing infrastructures, which rely on the provisioning and design of programmable networks. Current interests cover developments of control planes for quantum networks, in band telemetry and use of FPGA for enhanced network monitoring. She has an extensive list of publications on these topics and currently contributes to several national and international projects such as the EU-funded projects DESIRE6G, SLICES-RI, as well as international initiatives like FABRIC.
