EXPLAIN CYBERSECURITY WITH AN APERITIF

NAVIGATING SECURITY CHALLENGES IN CLOUD ENVIRONMENTS

9th SEMINAR

DEC
11

4.00 pm

Aula R1
Politecnico di Torino

Silvia Vitali

Silvia Vitali holds a Master's Degree in Computer Science (2018) from the Polytechnic University of Turin. After various experiences in cybersecurity, she is now a Security and Privacy Engineer at Bending Spoons, where she leads the platform-side security team. Her work focuses on IT, infrastructure, and application security.

What about Bending Spoons? The name comes from The Matrix, where the hero learns that the impossible is often achievable. Founded in 2013 as a five-person startup, it has grown into a leading tech company with 400+ Spooners from over 35 countries. Our products—including Evernote, Issuu, Meetup, Remini, Splice, StreamYard, and WeTransfer—have been downloaded over a billion times, delighting millions daily.

While much has changed, our mission endures: to create a lasting positive impact on customers, Spooners, and society. An impossible mission? Maybe. But we're determined to find out.
